Beconfident Teeth Whitening Strips 10 Days

123098

Beconfident Teeth Whitening Strips are an easy and quick way to whiten teeth. The specially designed whitening strips are applied directly to the teeth, each envelope contains two strips that are individually designed for the best possible fit to the upper and lower jaw. The teeth whitening gel is based on our patented Dual Boost X1 teeth whitening gel + 0.1% peroxide, which in the first phase removes discolouration and in the second phase gives whiter teeth with the help of 32% bicarbonate. No shaping of mouthpieces is needed - just open the package and you are good to go! The strips are completely safe to use and do not create discomfort or increased sensitivity in the teeth. The package contains 10 x 2 teeth whitening strips which are enough for 10 days use and the strips should be used for 15 minutes at a time.

Technical

Carbamide Peroxide	0% (Zero)
