Beconfident Dental Guard Protect

150302

Beconfident Protect Dental Guard is useful for relieving cheek muscles and protecting teeth in the event of teeth clenching and teeth grinding or bruxism.

Beconfident's own mouthguard is light and flexible but is still durable. It has bite plates that relieve the cheek teeth, and prevents the front teeth from being bitten together and also allows a free airway. Beconfident's sleep mouth guard only needs a one-time adjustment to protect your teeth in comfort. This is the perfect guard for a first-time user who needs to start sleeping with a mouthguard. Finally you can wake up full of energy!

– Suitable for the first-time user

– High comfort (minimalist design)

– Lowest price

Beconfident Protect is approved as a medical device by the Swedish Medical Products Agency and follows their regulations LVFS 2003: 11, LVFS 201: 7; LVFS 2001: 5. Beconfident guarantees that it does not contain BPA, silicone, acrylic, gluten or any harmful toxins and will not leak any chemicals into the mouth. It is manufactured in an FDA-inspected facility and is not made of natural rubber latex.

Package includes a handy storage box and instructions for use. Please note that opened packaging cannot be returned due to hygiene reasons.
