

Beconfident Revitalising Boost Serum

181098

With Revitalising Boost Serum you start the day with a boost of energy and prepare your skin for external stressors. Revitalising Boost Serum contains Hylasome® EG 10, which is a non-animal developed hyaluronic acid that is 50 times more water binding than regular hyaluronic acid and 5 times more moisturising after 24 hours. It also contains Pantenol, which in contact with the skin is converted to pantothenic acid (vitamin B5), which has an anti-inflammatory function and can relieve itching, while helping to soothe a dry and irritated skin.

Just like Cleanser Antioxidant, Revitalising Boost Serum also contains organic green tea extract but also Superox-C, which comes from Kadadu Plum, which is called a super fruit. Superox-C helps to reduce fine lines, wrinkles and even out skin tone thanks to the high content of vitamin C. In this way, your natural antioxidants are awakened and this intelligent boost will rebuild your skin like never before. Also works perfectly to smooth on after a treatment with microneedling or dermaroller. Packed in our airless bottle, the serum retains its effectiveness and also remains hygienic.

Technical

Content	30 ml
CPNP Number	2036689
Country of Origin	Sweden

Ingredients
