

Beconfident Clear Skin Start Kit

190097

Beconfident Clear Skin Start Kit is a complete problem skin system with everything you need to reduce pimples, clots and acne in two easy steps.

Step 1 - Clear Skin Prepare contains lactoperoxidase, which is a unique colostrum product that has the task of reducing the acne bacteria with the least possible irritation of your skin. The products are gentle but contain ingredients that effectively reduce your acne problems, while strengthening the skin in the long term and thus preventing new pimples from occurring.

Step 2 - Clear Skin Reduce with daily use will make skin more resistant and stronger long term so that new acne does not occur and will thus limit your future problems.

Acne is best treated in each phase with just the right amount of active ingredients. We therefore sell the treatment as a complete kit containing two airless bottles (for the best possible hygiene), Clear Skin Prepare to start the treatment with and Clear Skin Reduce for a long-term lasting result. In this way, your acne is fought as effectively as possible in each phase.

Clear Skin is developed by experts at Lund University in Sweden and with clinically proven results that show a 30% reduction in acne in 3 weeks and up to 65% after 6 weeks. Clear Skin products do not contain acetylsalicylic acid, which may irritate an already sensitive skin.

The package contains 1 x Prepare (10 ml), 1 x Reduce (10 ml) and instructions for use.

Technical

Content	20 ml; 20 ml
