Beconfident Value Teeth Whitening Kit

BCBDL013

Beconfident's patented Dual-Boost X3 teeth whitening gel uses three different modes of action to brighten teeth up to 6 shades whiter in 14 days. In the first active phase, superficial discolourations are gently removed from the teeth. In the second active phase, a highly efficient whitening ingredient complex removes deeper discolouration from the teeth and visibly brightens them. Following the gel treatment, the additional mint flavoured Tooth Gloss protects teeth from new discolouration occurring and gives them fantastic shine. The result - bright white teeth for a beautiful attractive smile. The package contains 1 x 8 ml teeth whitening gel syringe which is enough for 8 days use, plus 1 x Tooth Gloss Mint (10 ml tube). Instructions for use also included.

Beconfident custom fit Teeth Whitening Mouth Trays can be used together with all Beconfident's different teeth whitening gels. A suitable mouth tray is a prerequisite for a successful teeth whitening result as it is critical that the gel has as optimal contact as possible with the tooth surface. The mouth trays come with detailed instructions on how to easily shape each one to your own upper and lower tooth row. The package contains 2 x Teeth Whitening mouth trays plus gel applicator for treatment of individual tooth surfaces and instructions for use.
